

## LCD25 2.5 inch LCD Monitor

This is a useful 2.5" LCD monitor for lining up cameras or monitoring a recording.

The LCD monitor is a high contrast and high resolution version and can be used for camera focus and colour adjustment, even in sunlight.

The LCD25 has a built-in loudspeaker, so can also be used to check or listen to audio.

There are controls for brightness, colour and volume on the side of the monitor.

The inputs are as follows:

- Yellow RCA – Composite Video Input
- Red RCA – Line Level Audio input
- Black DC socket – 2.1mm DC socket for 12V DC input, centre pin is positive
